

## **In the Beginning**

Fortunately, fortune is rather easy to come by. It has become ever so complicated and convoluted by misconceptions and false ideas, but it is fundamentally simple when these mis-ideas are stripped away.

As long as we focus.

And focus is the key. You cannot enjoy the rich knowledge of matters of earth abundance and material wealth if you half-heartedly pay attention to the components and influences of such matters. Yet, that's pretty much what people do all the time. They half-heartedly pay attention to those matters they supposedly want. You cannot achieve a "want" or a goal without diligent focus.

If you have not yet experienced the abundance in your life that you would like, you can learn by your missteps as much as from your successes. See, the absence of success is often a stronger indication of what will work than what actually works. Sounds contrary, yes? However, often if success comes too readily, there is no FOCUS on what brought it about and, therefore, no way to duplicate it once gone.

Karen acts a conduit to receive the material for this book. All that exists in the eternal journey may have been forgotten on a day-to-day basis, but it does not prevent you from tapping into the river of universal of knowledge, either through your own intuition or through Karen's access. Understanding that you are interconnected with all that exists can help you to recognize that you are not alone in your moments of defeat,

in your moments of discovery, and in your moments of celebration. Throughout this workbook, we will share with you little anecdotes about life in the energy realm. Perhaps our stories will trigger your own memories about your journey as a soul before you leaped into physical existence.

First, let us tell you the most basic difference between reality created among those on earth and those souls without a physical vehicle. The prime difference is that here, we KNOW that we create our reality and we do so willingly and brilliantly. On earth, a type of birth amnesia occurs – perhaps as a learning tool for the soul’s growth, and this amnesia prevents earthlings (most earthlings) from remembering that they create their reality with their thoughts.

We will attempt, through this workbook, to remind you how to create your reality in the area of abundance and material wealth. It’s not very hard. Earthlings often overcomplicate or over-think matters, but if you give these exercises an earnest try, you will likely realize results that appeal to you within a reasonable amount of time.

Let’s talk about “reasonable amount of time.” The basis of knowledge on earth about quantum physics teaches that there is no such thing as time. This is true. There is no such thing as time. The universe *wants* to provide you with all that you desire, but since time does not exist in universal terms, the time frame in which this process can occur is not quantifiable. Why are we telling you this? Because if your results are not occurring as quickly as you would like, then we ask that you please be patient a bit longer. YOU do not define the time frame; the universe will comply as it can

within the amount of time necessary to comply.

We must state the assumption that you have read **THE ANSWERS to your questions about life** by now. **THE ANSWERS** book is the precursor to the exercises in **MONEY WISDOM**. Alone, neither can propel you as “quickly” (hmmm ... didn’t we just contradict ourselves?) as together they both can (and by “quickly,” we mean “effectively.”) Towards the end of **THE ANSWERS**, an exercise is delineated that provides the basis for what is to come in this book. This exercise can be effective for altering or taking charge of your reality in many areas, not just wealth, but this book will focus simply on wealth as an opportunity to strengthen your focus on one desire.

The next portion of this book is meant to enlighten you about matters of money that you may not be aware. The most studied student of economics or the wealthiest venture capitalist cannot know these next matters of money unless they are immensely intuitive or never experienced earth amnesia (the disconnect from eternal memories).
